

**LoJack® Supply Chain Integrity Protects Cargo throughout the Global Supply Chain –  
From Point of Origin to Point of Destination, Across Land, Air and Sea  
&  
Become a member of Supply Chain Information Sharing and Analysis Center (SC-ISAC)**

*Creating a Visible, Secure, and Reliable Transit Operation in Today's Complex Supply Chain*

In today's global economy, products are frequently manufactured on one continent and shipped to another for consumption. This extended supply chain and transit operation includes multiple modes of transportation, crossing oceans and continents, plus a complex customs process. Generally, the cargo travels unmonitored, has little to no visibility, is subject to delays, may encounter adverse environmental conditions, and is at risk to possible tampering and theft.

LoJack® Supply Chain Integrity took a major step forward in solving this business problem by launching several next generation products, CargoSafe™, ContainerSafe™, and FlightSafe™, as part of its LoJack® InTransit™ solution. This breakthrough technology and solution delivers global cargo protection that provides 24/7 visibility for shipments as they move through the international supply chain - from point of origin to point of destination, across land, air and sea. It enables businesses to track, monitor, and control the various and complex aspects of cargo in-transit with complete visibility through a single user interface, enabling complete monitoring support and recovery capabilities.

The solution can be customized to meet the specific needs of customers and to protect goods across any combination of transportation modes by using the CargoSafe™, ContainerSafe™, and FlightSafe™ tracking devices embedded in the cargo and/or installed on the trailer or container door to detect and protect against intrusion.

LoJack® SCI InTransit™ uses a combination of GPS, Cellular, and Radio Frequency (when appropriate) to ensure continuous tracking. Customers have the option to integrate satellite communications (SatComm) technology for ocean coverage or coverage in remote land based locations where there is no cellular coverage.

LoJack® SCI InTransit™ offers customers 24/7/365 visibility into the location and condition of their shipment through the entire chain of custody. The system enables users to set up monitoring parameters and define alerts in the event that negative conditions are triggered - such as

temperature, humidity, shock, tampering or an intrusion take place, which enables them to make key decisions to preserve the integrity of the cargo. For recovery, LoJack® SCI InTransit™ benefits from LoJack's long-standing relationship with law enforcement agencies throughout the U.S. and its own extensive multi-agency law enforcement database and recovery network.

This next generation solution will enhance a company's participation in the Customs - Trade Partnership Against Terrorism (C-TPAT), the voluntary government-business initiative designed to strengthen and improve overall international supply chain and U.S. border security, which helps organizations to expedite the movement of cargo through ports and customs.

"This groundbreaking product clearly sets us apart from competitors in our industry," said Robert Furtado, President and CEO, LoJack® Supply Chain Integrity. "No other company has this combination of offerings that can protect and provide visibility of cargo across the entire supply chain, whether it is on land, in the air or at sea; and from theft and environmental conditions."

#### **Availability:**

Customers can configure the solution by selecting the transportation modes and sensor applications that meet their needs. Purchase and lease options are available.

For more information, please call 1-800-616-8581 or e-mail [info@sc-integrity.net](mailto:info@sc-integrity.net)

- CargoSafe™ - embedded in-cargo devices for over road and rail transport
- FlightSafe™ - embedded in-cargo devices for air transport
- ContainerSafe™ - trailer and container doors devices for highway, railway, and ocean transport

*Become a member of Supply Chain Information Sharing and Analysis Center (SC-ISAC)*

The Supply Chain Information Sharing and Analysis Center (SC-ISAC) was established in 2007, joined the ISAC Council, and began providing its constituency information sharing and intelligence specific to supply chain incidents, threats, and vulnerabilities. It now reaches an extensive supply chain community which includes Manufacturers, Wholesalers, Transportation and Logistics Services, Retail, Business/Security Services, Associations, Insurance, and Law Enforcement and Government.

The SC-ISAC performs an operational role in the collecting, analyzing, and disseminating alerts and incident reports to the public and private sector that helps safeguard the supply chain as a critical infrastructure of the United States. The SC-ISAC also plays a role in increasing the awareness on all risks and providing actionable intelligence which can be used in operations planning, asset protection, and in building business resiliency.

As an SC-ISAC member, which has grown to 700 organizations and 1700 users, you can continue to expect and enjoy the following benefits:

- Vetted organizations and associated users to maintain a trusted community in which to share information
- Bulletins on supply chain news, events, and theft incident reports covering trucks, trailers, cargo, and warehouses
- Critical time-sensitive and actionable communication of Alerts and Advisories on known criminal activity and organized crimes throughout the supply chain
- Quarterly and annual reports on cargo theft trends and recommendations to better protect your supply chain
- Digital reference library of cargo theft reports and other incidents from various organizations for users to access
- Database search, research, and analytical support for member organizations on specific inquiries
- User created and published bulletin items with "My Incidents" section to manage incidents and share information
- Training to law enforcement partners on cargo theft and carrier practices
- The NC4 External Situational Awareness Map with Incident Monitoring
- Access to the Law Enforcement Dispatch/Recovery Service available 24/7/365
- Access to the hosted Incident and Case Management Software Application and Database

For more information on joining SC-ISAC please contact either JJ Coughlin, Executive Director SC-ISAC at [jjcoughlin@sc-integrity.net](mailto:jjcoughlin@sc-integrity.net) or call 972-552-5635 or Jackie Neill, Senior Analyst SC-ISAC at [jackie.neill@sc-isac.org](mailto:jackie.neill@sc-isac.org) or call 720-413-8000 or go to [www.sc-isacmembership.com](http://www.sc-isacmembership.com)

**LoJack® Supply Chain Integrity (LoJack SCI)** provides an integrated solution for supply chain protection that includes information sharing and analysis, supply chain intelligence, chain of custody and control, covert tracking, monitoring and recovery. LoJack® Supply Chain Integrity is building an extensive, diverse community of members representing private industry, law enforcement, and government—who for the first time have a platform to share information and combat supply chain threats, making the company a powerful force in the market. Founded in 2004 as Supply Chain Integrity, the company was renamed LoJack® Supply Chain Integrity following an investment from LoJack® Corporation (NASDAQ: LOJN) in 2008.
